24th January 2019

To Whom It May Concern

REACH Regulation (EC) No. 1907/2006

The European Regulation concerning the registration, evaluation, authorisation and restriction of chemicals ("REACH") provides a special procedure for the handling of substances which are said to bear a very high risk for health and environment. Those substances of very high concern (SVHC) are included in Annex XIV of the REACH regulation. They have been published since October, 2008 in the candidate list of SVHC for Annex XIV of the REACH regulation.

The European Chemical Agency (ECHA) advised on 15th January 2019 that 6 more substances have been added to the candidate list bringing the total to 197. According to our knowledge, no substances listed in the update list of SVHC are contained within Silex products in concentrations above the threshold limit of 0.1%.

RoHS (Restriction of Hazardous Substances)

None of the substances mentioned in Directive 2011/65/EU (RoHS 2) and Directive 2015/863/EU (RoHS 3) are intentionally introduced during manufacture. Therefore they are not expected to be present except for trace amounts from incidental environmental contamination.

WEEE (Waste of Electrical and Electronic Equipment)

None of the substances mentioned in Directive 2012/19/EU (WEEE) are intentionally introduced to our silicone rubber products during manufacture. Therefore they are not expected to be present except for trace amounts from incidental environmental contamination.

The information given is accurate to the best of our knowledge and with information provided by our raw materials suppliers.
