18th March 2020

With the continued updates and advice being given out regarding Coronavirus/Covid-19, we, as a business, are striving to prevent the spread of the virus and at the same time, reduce any impact on the smooth running of our business.

In order to protect our employees and ensure safe operations, Silex is taking various measures according to the national and local disease control requirements and will continue to follow advice from the World Health Organisation, Public Health England and the Dept of Health and Social Care.

We have contacted our key raw material suppliers and, as at the date of this letter, we do not anticipate any break to the supply chain. At present, material stocks remain healthy and our production lead times remain unchanged. Contingency plans are in place to cope with potential staff absences.

As this is an evolving situation, we continue to monitor and review daily updates from the experts and will review our policies and approach to the Covid-19 outbreak as the situation changes.

Further updates may follow as the situation continues to develop.
